You get expert and professional technicians without spending lots of money.

04 INCREASE UPTIME

Focus on Other Things and Leave Maintenance to the Pros.

06 REPORTS

Get Quarterly report & improve productivity.

Cryptch

RED HAT CERTIFIED SYSTEM ADMINISTRATOR

What Is RedHat?

Red Hat® Enterprise Linux® is the world's leading enterprise Linux platform.* It's an open source operating system (OS). It's the foundation from which you can scale existing apps—and roll out emerging technologies—across bare-metal, virtual, container, and all types of cloud environments.

Red Hat Enterprise Linux extends your hybrid cloud infrastructure to the edge—across hundreds of thousands of nodes all over the world. Create edge-optimized OS images, minimize workload interruptions caused by OS updates, transfer system updates more efficiently, and have confidence in automatic health checks and rollbacks.

Why RHCSA?

RHCSA is an entry-level certification that focuses on competencies at system administration, including installation and configuration of a Red Hat Enterprise Linux system and attach it to a live network running network services.

To achieve the RHCSA certification the student must pass EX200, a 2.5-hour hands-on lab exam. The minimum passing score for the exam is 210 out of 300 possible points (70%). There is no prerequisite for the exam, but Red Hat recommends preparing for the exam by taking courses in Red Hat System Administration (RH124 or RH134) if one does not have previous experience.

RHCSA was launched in 2002 as Red Hat Certified Technician (RHCT). As of July 2009 there were 30,000 RHCTs. In November 2010 it was renamed to RHCSA.
